JCI Active Citizen Framework

JCI Active Citizen Framework

A Better World Begins Here

ANALYZE

Examine Community Needs

To enable communities to achieve sustainable impact, the community's needs must be analyzed and understood first in order to identify their root causes.

REVIEW | Monitor and Evaluate Results

It is important to monitor progress throughout the project to determine if the goals and intended impact are on track to be achieved. Finally, analyze data to measure the resulting positive change.

DEVELOP | Formulate Sustainable Solutions

By uniting with stakeholders from all sectors of society, projects are formulated to address the community's core needs and their root causes. Collaborators outline a project plan including goals, actions and desired outcomes. Solutions target three integrated stages of community development that drive a community toward prosperity.

EXECUTE

Take Action

Once the need and root cause have been identified, active citizens take action by mobilizing resources, rallying support and implementing the project plan. By combining resources, the community is enabled to achieve even greater sustainable impact.

① Health and Wellness

② Education and Economic Empowerment

③ Peace, Prosperity, and Sustainability

Project Management

- **A Business Plan that covers every aspect of running a project to help plan a successful project. Includes:**
 - Goal setting & Budgeting
 - Manpower needs/resources
 - Contingency planning & Schedule development
 - Project evaluation and recommendations
